March 5th, 2010.

Dear Valued customer,

We have been informed by our paper mills that the price of board has been increased again. During the last two years Corner Edge has absorbed these costs, but unfortunately, this time we are unable to do so. All deliveries made after March 31st will be subject to an 8% increase.

This increase by all North American paper mills is the result of Recycled Fiber increases from US\$35.00/ton to US\$170.00/ton in the last year alone and Recycled Fiber shortages due to higher demand from domestic mills and export.

Please understand that this increase is beyond our control and we look forward to your continued business in the future.

We will be contacting you shortly to discuss possible alternatives to offset the increased prices.

Assuring you of our total commitment to quality and service.

Yours truly

Martin Silver
President.
